Extracts: The Trade of the Talked Mingalis. The official Trade Returns, just now! comfact as it appears upon the new accounts; and the first deduction is that it represents a decline of about 5.000,0001 compared with the trade of the corresponding period in 1866. That Return, however, was exceptionally large, so that the reduction expresses no serious abatement of the national industry. If we now proceed to analyze the aggregate before us, we shall soon arrive at three or four principal divisions. Just one quarter of the whole business was transacted with our own colonies, and all but one half of that amount is due to India. In fact, if we set down 10,000,0007, to Unidia. fact, if we set down 10,000,000, to India, 4,000,000, to Australia, 2,000,000, to Canada, and 1,000,000, to Singapore, we shall have accounted at once for 17,000,000, ont of the 22,000,000, while Hongkong, the Cape, and the West Indies will take nearly 3,000,000, more. The remainder is divided between 15 colonies or settlements, of which Gibraltar, Malta, and Cerlon are the most important, and the Falk ports do not reach. In round numbers, we may again distribute this total between the four almost as good a customer to us as the United States. Our trade with France 5,800,0001 -is little more than half that with Germany, but it is buoyant, and may be materially increased. With Holland a very large busines is done considering the smallness of the country. The Netherlands, with a population of 8,500,000, customer than Russia or Spain; though as to gards the latter country it should be observed that we do a very considerable, business with Onba and the Philippines. The frate with Cuba in particular has been larger this year than the trade with Japan, and all but he large as that with Portugal. To Greece we actually send less than we do the blacks of San Dontingo. Our Asiatic trade-that with British possessions excepted—is of course mainly with China, which takes upwards of 2,000,000l, worth from us, while Japan figures for rather less than half that amount, and the Dutch East Indies for about 700,0001. Our trade with Africa resolves and, consequently, the exports and imports set down to the account of that country are preternaturally large. Western Africa, however, does figure for usarly 500,000L, in the total of 5,000,0001, and a pittance of some 25,0001, is contributed by "Eastern" Africa. Whether the

Abyssinian expedition will bring any modifica-tion in these figures we cannot pretend to con-jecture. As to Northern Africa, Morpouo, Tunis-and Algeria find places in the list, beyond doubts —the former country counting for 100,000%. but the great French colony bays little more from us than Madagescar. In America-British colonies again excepted -we may say that our trade is pretty equally divided between North and South that is, the bered, however, that throughout these remarks we have been speaking only of the first six moths of the present year, and that the Returns of the period have been affected by excentional circumstances. Trast year, for instance, our trade with the United States was above 15,000,000l, instead of under 12,000,000l. the difference being explained partly by, the deficiency of the American harvest in 1866, and partly by the effects of the present prohibitive tariff. America, it may be hoped, will one day resume her old transactions with us, but in the meantime there is something very remarkable in the commercial progress made by the states of the Southern Continent. Brazil; though her account has considerably fallen off were blockaded by the Spinish isquadron, and the return from 570,000% in 1868 to 1,500,000% in 1967. Besides these states the Argentine Republic, New Granada, and Uruguay are large dealers with up, and Venezuela and Equador, add their quotas to the total. With Mexico. considering the capabilities of the country and the incredible wealth of its soil; we are doing next to nothing, and perhaps the less we do the The countries bringing up the end of the list whibit some carrious variations, all, no doubt, to a accounted for, but showing thow capricious the demands of such places must be considered. Lust year, for instance, the "Islands in the Pacific." bought goods to the value of 100,000/. 3.0741., and Madagascar from 1,6122 to 3,3192. Moreover, if Siam: has disappeared from our books, two entirely new qualcours have presented the needves. The "French possessions in ludia" open an adminit with 2.07M., and the "Northern Whale Fisheries", wight 10 1/4 Perhaps the most assuring feature in these. Returns, in the magnitude of the area cover which the transactions extend. Forty-eight states and twenty-two colonies, covering between them the whole habitable globe; deal more or less with these islands, This division of risk or multiplication of opportunities tends incredibly. to the sufety of our trade. When one door shuts another upone, says, the proverb; and we have seventy doors to rely upon. The whole world cannot be in difficulties at once, and some ough tomers are sure to make up for the backwardness also maint in our own industry. We undertake, Government.
